

**AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions and listings of claims in the application.

1. (Original) An automotive interior trim assembly for coupling to an automobile, comprising:
  - a substrate member forming at least a part of a structural support of the trim assembly, said substrate member having a front surface adapted to face the interior of the automobile and a back surface adapted to face opposite said front surface;
  - a connecting member integrally molded with said substrate member and extending away from said back surface, said connecting member having an aperture formed therein; and
  - a grommet integrally molded in said aperture and adapted to secure a wire to said connecting member so as to prevent movement of the wire with respect to said substrate member.
2. (Original) The trim assembly of claim 1, wherein said substrate member has a hardness and said grommet has a hardness that is relatively lower than the hardness of said substrate member.
